We are seeing an increase in the plans of service, that the effective date is prior to the meeting date. This should not be happening; the meeting date should be prior to the effective date. If your plan was ending on Friday, the planning meeting was on Friday, the person no-showed but all the services continued, you might reschedule the planning meeting for next week, but you don't want a gap in the plan so date the plan Saturday, but note your meeting was today, you sign everything today, so you are not back dating a signature. If all staff could do the meetings in advance, it would be helpful. We need to make sure that the date does not populate unless the plan is active. We could ask PCE to add a rule to say the plan effective date cannot take place before the meeting date. This would force compliance with the procedure.</li> <li>h. Defer</li> <li>i. The majority of MPA consumers is face-to-face. People do not want to come in and there are excuses to just do a phone conference, not even a video conference. Not sure if this is excluded or allowed as an expense under Covid emergency funds. BABH could consult with MPA for funding. We still have to support provider choice. When it comes to health, safety, best practices, etc., we have to refer to the treatment team of which they feel is the most appropriate meeting choice for the individual. Preference is considered, but not to where it makes the treatment suffer. Just because someone files a grievance does not mean we have to come to a resolution that makes them the happiest.
